## Permalite® VRib® **Data Sheet**

13th December, 2016

### VRIB® PROFILE DIMENSIONS

### **Product Description and Features**

The wide cover width of Permalite® VRib®, in conjunction with its symmetrical profile, provides a roofing sheet which can be used effectively on walls also. A distinctive capillary drain in the rib overlap ensures weather security.

As well as providing a neat, balanced appearance on buildings, this profile is also effectively used as insulation jacketing in power stations and chemical processing plants.

Other features include:

- Can be used for both roofing and walling applications
- Available in a wide variety of colours
- May be used in roof pitches as low as 3 degree (1 in 19)
- Spring curve to a radius as low as 18m

0.70mm, 0.90mm & 1.2mm Thickness range (BMT):

0.85m to 23.0m Length Range:

Pan Cross Section area: 16,342mm<sup>2</sup>/metre sheet width Tolerances: Length +0mm, -15mm

Width ±4mm

Finishes: Mill, Stucco Embossed, Painted

#### **Colour Availability**

The following Permalite® standard polyester paint colours are applied to the coiled sheet by reverse roller coating and heat curing on BlueScope paint lines employing the latest painting technology.

| Enduro Green | Glacier White | Moonshadow | Sahara | Gull Grev | Slate Grev | Obelisk Grev |
|--------------|---------------|------------|--------|-----------|------------|--------------|

Other colours/ fluorocarbon paints are available upon request and subject to MOQ's.

#### **Design and Installation**

Permalite® VRib® limit state wind pressure capacities are based on data in accordance with AS 1562.1:1992 Design and installation of sheet roof and wall cladding: Metal, and AS 4040.1:1992 Methods of testing sheet roof and wall cladding – Resistance to concentrated loads. The wind loadings used in conjunction with these tables are to be determined in accordance with AS/NZS 1170.2:2002 Structural design actions – Wind actions.

These tables and all installation data/details can be found in the Permalite® Aluminium Roofing Solutions manual, available for download at www.permalite.com.au.

## **Material Specification**

Permalite® VRib® is produced from marine grade aluminium 5251 and 5052 H38 temper to AS/NZS 1734:1997 Aluminium and aluminium alloys – Flat sheet, coiled sheet and plate.

Chemical Composition of 5251 and 5052 (% max except where range is given)

| Allov | Qi.  | Fe       | Cu   | Mn        | Ma        | Cr        | Zn   | Ti   | Others |       |
|-------|------|----------|------|-----------|-----------|-----------|------|------|--------|-------|
| Alloy | 5    | <u> </u> | G    | IVIII     | Mg        | 5         | 4    |      | Each   | Total |
| 5251  | 0.40 | 0.50     | 0.15 | 0.10-0.50 | 1.70-2.40 | 0.15      | 0.15 | 0.15 | 0.05   | 0.15  |
| 5052  | 0.25 | 0.40     | 0.10 | 0.10      | 2.20-2.80 | 0.15-0.35 | 0.10 | 0.15 | 0.05   | 0.15  |

#### Characteristics of 5251 & 5052

Corrosion Resistance: Excellent

Anodising: Fair (finish cannot be guaranteed to meet the requirements of AS 1231:2000 Aluminium and Aluminium

Alloys – Anodised Coatings for Architectural Applications)

Very Good Formability:

Machinability: Fair

Very Good Weldability: Brazeability: Poor

#### Alloy Mechanical Properties

The following properties are typical of mill finish, unpainted sheet.

| Alloy                           | 5251 | 5052 |
|---------------------------------|------|------|
| Temper                          | H38  | H38  |
| Minimum Yield Strength (Mpa)    | 225  | 220  |
| Ultimate Tensile Strength (MPa) | 260  | 270  |
| Elongation (0.70 BMT)           | 3%   | 3%   |
| Elongation (0.90 BMT)           | 4%   | 4%   |
| Elongation (1.20 BMT)           | 4%   | 4%   |

## **Thermal Properties**

Coefficient of thermal expansion: 23.9 x 10<sup>-6</sup> per °C (approximately 1.17mm/m over 50°C temperature change).
