

ALUMINIUM BUILDING SOLUTIONS The stylish solution
for the toughest conditions

COLOURS & FINISHES

Colours and profiles to suit any project

JUST BECAUSE YOUR PROJECT DEMANDS OUTSTANDING DURABILITY IN AN AGGRESSIVE ENVIRONMENT DOESN'T MEAN YOU HAVE TO COMPROMISE ON IMPORTANT AESTHETIC QUALITIES.

PERMALITE® cladding solutions are available in a variety of finishes, profiles and standard colours, with custom colours available by negotiation.

All PERMALITE® cladding profiles can be specified in a choice of three finishes.

Mill Finish gives PERMALITE® cladding a smooth, lustrous finish which will dull relatively quickly by a weathering process which enhances its natural corrosion resistance.

Stucco Embossed Finish modifies the Mill Finish to reduce the reflectance in applications where this is required.

Painted Finish Choose from a range of popular colours developed using BlueScope's extensive expertise in colour coating roofing metals. Colours suitable for every application, from a 5 star seaside resort to a chemical plant or a coal loader.

Profiles styled for strength and performance

The PERMALITE® range consists of four stylish aluminium roofing and walling systems: PERMALITE V-RIB®, LT7®, ALSPAN® and WAVELINE®.

PERMALITE V-RIB® provides a wide (915mm) cover and a symmetry which makes it equally suitable for roof or wall cladding. A double capillary drain in the rib overlap ensures weather security.

PERMALITE V-RIB® is available in 0.70mm, 0.90mm and 1.2mm thicknesses.

LT7® is the ultimate in cladding versatility, due to its strength, water carrying capacity, fixing economy and eave closing features. It is available in 0.70mm, 0.90mm and 1.2mm thicknesses and can be reversed to provide a bold wall effect.

ALSPAN® was designed specifically to provide a wide spanning capability, to have a high water-carrying capacity and to accommodate construction and maintenance foot traffic.

ALSPAN® is available in 0.70mm and 0.90mm thicknesses. Its distinctive ribs and wide pans make it a natural choice for well-defined presentation of large areas.

WAVELINE® is the Australian classic corrugated roofing profile proven for its style and versatility. With a coverage of 762mm it is quick to install and provides minimum wastage.

WAVELINE® is suitable for use as both a roof and wall cladding the universal appeal of this profile means it can be used to complement either a traditional or modern design on any building project.

Colours

Other colours are available by negotiation dependent on the size of the project.

Please Note: The PERMALITE® colours shown in this leaflet have been reproduced to represent actual product colours as accurately as possible. However, we recommend checking your chosen colour against an actual sample of the product before purchasing, as varying light conditions and limitations of the printing process affect colour tones.

Expert assistance and warranties

To help make the most of any PERMALITE® solution you can call on the wealth of experience accumulated by BlueScope to assist with design advice, custom colours or even on-site assistance.

Permalite Aluminium roofing products are supported by extensive warranties of up to 40 years on the aluminium substrate.
